Almost a year has passed since the successful international workshop Light Pollution 2022, held under the Czech Presidency to the EU in Brno. This year, the Ministry of the Environment of the Czech Republic will follow up with an expert webinar.

The programme will feature news from the regulatory approaches to light pollution in various European countries as well as interesting international projects.

The event will be held in English and online only.

Registration will be open until 20<sup>th</sup> October. Please note that only registered participants will receive the link for connection.

**We are looking forward to virtually meeting you.**
